April 20,2010

Dear Dr. Sylvia,

It is with sincere gratitude and pleasure I give testimony to your abilities as an acupuncture physician. In July, 2009 It was suggested that I might try acupuncture for relief of severe and crippling hip and back pain as a result of hip replacement surgery.

I had tried medication, physical therapy, and pain management lumbar injections - all resulting in temporary relief that lasted at most six weeks. In just five acupuncture treatments at New Life, I began to find great relief and hope for further improvement. I continued on with the treatments until only once-a-month maintenance sessions were needed. Now I am totally free of both the hip and back pain.

I highly recommend that anyone who is suffering ongoing pain to seek your help. They won't be disappointed.

Thank you for your gracious manner, sincere understanding, patience, and perseverance until my pain was erased and I felt human again.

Gratefully,  
SCP
